RE: Randall Candaso
CHLA #: 1590052
DOB: 04-01-2004

To: United States Probation Office

This letter is being written on behalf of Randall Candaso, who is a patient at Children's Hospital, Los Angeles. Randall was diagnosed with Acute Lymphoblastic Leukemia (ALL), a childhood cancer on 10/07/05. The family is currently here in Los Angeles while Randall is receiving treatment.

Both parents have remained at Randall's bedside since his date of diagnoses. Randall will need the support of his parents to assist in his care for the duration of his treatment which is (approximately 3 years) we are asking for your consideration of any support that you can give this family. Randall began an intensive chemotherapy regimen since the date of diagnosis. As a result, his immune system is suppressed and is highly susceptible to infection. He must be monitored closely, particularly during this induction phase of treatment. Once discharged from the hospital, Randall will have clinic visits for chemotherapy and testing which range from weekly to monthly.

Your compassionate consideration of this request is greatly appreciated. For further information or clarification of this matter, please contact me at (323) 669-2225.

Sincerely,

Leo Mascarenhas, MD
Assistant Professor of Pediatrics
Attending Physician
Children's Center for Cancer And Blood Diseases
